

Ancient Human's Life

1

Children! Look at the pictures carefully. Do you like them? What do you think about them? These humans are known as ancient humans.

Let's
Think

Early Humans

They used animal skins and tree leaves to cover their bodies and only ate fruits and raw vegetables. Their life was very simple. Then with the passage of the time, they discovered fire by rubbing two stones together. The fire changed their life as then they were able to cook the meat of animals.

Early man Hunting Animal

They killed wild animals with sharp stones that were invented by them.
Early humans hunted animals for their food.

Later, they started doing farming. They learnt how to grow crops. They also domesticated some useful animals for various purposes. Dog was the first faithful animal domesticated by early humans.

Wrap up

- Early humans discovered many things like fire, tools, farming, etc.
- Early humans hunted animals for food.
- Early humans lived in forests and caves.
- Later they started to domesticate useful animals.
